Professional Summary

DevOps Engineer with expertise in automating processes and optimizing infrastructure to enhance software delivery. I have 1 year of experience and am proficient in containerization (Docker, Kubernetes), CI/CD pipelines (Jenkins, GitHub Actions, GitLab CI), and monitoring (Prometheus, Grafana). Skilled in Infrastructure as Code (Ansible, Terraform) and cloud computing with Azure and AWS. Passionate about implementing DevSecOps best practices to ensure secure and reliable software solutions.

Certifications

- Microsoft Certified: [Azure Administrator Associate \(AZ-104\)](#)
- CCNA Certification - Adan IT Center, 2024

Work Experience

Associate DevOps Engineer - OpsOura June 2024 – Present

- **Cloud Infrastructure Management:** Managed and deployed cloud-native applications using **Azure CosmosDB, Function Apps, Storage Accounts, App Services, and API Management**, along with **AWS S3, CloudFront, Lambda, API Gateway, and DynamoDB**, ensuring high availability and performance.
- **Containerization & Orchestration:** Deployed and managed **Docker containers** and **Kubernetes clusters**, optimizing workload distribution and ensuring efficient resource utilization for scalable applications.
- **CI/CD & Security Integration:** Designed and optimized **Jenkins, GitHub Actions, and GitLab CI/CD pipelines**, integrating **Trivy and Snyk** for security scanning, **SonarQube** for code quality analysis, and enforcing security best practices.
- **Infrastructure as Code (IaC):** Automated cloud resource provisioning with **Terraform** and server configurations with **Ansible**, ensuring consistency and reducing manual effort.

Monitoring & Logging:

- Implemented **Prometheus and Grafana** for real-time system monitoring, performance tracking, and alerting.
- Configured **Datadog** for full-stack observability, enabling proactive performance optimization.

Skills

- **DevOps Tools:** Docker, Kubernetes, Jenkins, Ansible, Terraform.
- **Cloud Computing:**
 - **Azure:** CosmosDB, Function Apps, Storage Accounts, App Services, API Management
 - **AWS:** EC2, S3, Lambda, API Gateway, DynamoDB, CloudFront
- **DevSecOps:** Trivy, Snyk, SonarQube
- **Version Control:** Git, GitHub, GitLab
- **Monitoring & Logging:** Prometheus, Grafana, Datadog.
- **Operating Systems:** Ubuntu, Fedora, Windows
- **Programming & Scripting:** Bash, Python, HTML, CSS, JavaScript

Education

(Dars-e-Nizami) – Equivalent to Intermediate, Jamia Nusrat-ul-Uloom
Gujranwala, Pakistan Jan 2015 – Jan 2020
